

WEEK - 01

1#: Write a report of steps for installation of MySQL

MySQL is one of the most popular open-source relational database management systems. This report outlines the standardized steps for installing the **MySQL Community Server** on a Windows environment, following the structure of an Oracle XE installation.

Step 1: Before installing MySQL on Windows, you will need to download it. Go to <http://dev.mysql.com/downloads/> and select **DOWNLOAD** under **MySQL Community Server (GPL)**

Step 2: Choose **Windows** as the platform and download the installer:

Step 3: If prompted for the login, log in with your account or create a new one. After the download finishes, start the installer. Accept the license agreement and click Next:

Step 4: Choose the setup type and click Next:

Step 5: Click Execute to install the components:

Step 6: Next, the wizard will guide you through the product configuration:

Step 7: Choose your network settings of leave the defaults:

MySQL. Installer
MySQL Server 5.7.11

Type and Networking

Accounts and Roles

Windows Service

Apply Server Configuration

Type and Networking

Server Configuration Type
Choose the correct server configuration type for this MySQL Server installation. This setting will define how much system resources are assigned to the MySQL Server instance.

Config Type: Development Machine

Connectivity
Use the following controls to select how you would like to connect to this server.

☒ TCP/IP Port Number:

☒ Open Firewall port for network access

☐ Named Pipe Pipe Name:

☐ Shared Memory Memory Name:

Advanced Configuration
Select the checkbox below to get additional configuration page where you can set advanced options for this server instance.

☐ Show Advanced Options

Next > Cancel

Step 8: Next, you will be prompted to choose the root password:

MySQL. Installer
MySQL Server 5.7.11

Type and Networking

Accounts and Roles

Windows Service

Apply Server Configuration

Accounts and Roles

Root Account Password
Enter the password for the root account. Please remember to store this password in a secure place.

MySQL Root Password:

Repeat Password:

Password Strength: **Weak**

MySQL User Accounts
Create MySQL user accounts for your users and applications. Assign a role to the user that consists of a set of privileges.

MySQL Username	Host	User Role

Add User
Edit User
Delete

< Back Next > Cancel

Step 9 : Next, choose the name for the MySQL Windows service

Step 10 : Click Execute to apply the changes

And that's it! MySQL should be installed.
